

a Tree LEAF ISLAND

- makes FREE mulch, fertilizer, soil conditioner, soil aeration
- reduces the area of mowable lawn
- suppresses weeds
- feeds the tree that dropped the leaves
- makes “soft landings” for overwintering pollinators
- makes habitat for fireflies
- feeds birds
- feeds our foodweb, from tiny creatures on up!
- prevents erosion, flooding, compaction

up to 6 inches of leaves

soil

keep root flare clear!
